JOB TITLE: Assembler/Tester II

DEPARTMENT: 042/043 Operations

CATEGORY: Hourly - Direct

REPORTS TO: Flow Manager

QUALIFICATIONS:

- High School Diploma or GED preferred.
- A minimum of two years' experience on repair and testing of flight controls, landing gear, or other hydraulic component maintenance.
- Ability to use measuring equipment to include calipers, micrometers, gauges, and digital multi-meters.
- Ability to read blueprints and drawings.
- Working knowledge of FAA repair, overhaul, and testing procedures.
- Able to lift, support and move 40 pounds.
- Familiarity of Lean/Sigma processes in a manufacturing environment preferred.
- A & P or Airman's Certificate desired.

DUTIES AND RESPONSIBILITIES:

- Disassemble, inspect, measure, repair, assemble, test and troubleshoot aircraft hydraulic, electro-mechanical and pneumatic components and landing gear.
- Track and maintain accountability for all issued equipment and materials required to perform essential elements of the job.
- Perform all work according to all applicable governmental, OEM, and company procedures.
- Develop continuous improvement ideas applicable to companywide processes and participate in working groups implementing those actions.
- Participate and work closely with others in a team environment to create a positive environment focused on quality and customer driven delivery expectations.
- Practice good housekeeping at all times.
- Ensure safety policies are followed and adhered to at all times.
- All other duties as required.
